Contents of Volume 246

Vol. 246 Nos. 1–4 **May 1, 2001**

Review

A review of bivariate gamma distributions for hydrological application
S. Yue, T.B.M.J. Ouarda and B. Bobée 1

Research Papers

Offshore continuation of coastal groundwater systems; predictions using sharp-interface approximations and variable-density flow modelling
H. Kooi and J. Groen 19

Rainfall entropy for delineation of water resources zones in Japan
T. Kawachi, T. Maruyama and V.P. Singh 36

Quantitative flood forecasting using multisensor data and neural networks
G. Kim and A.P. Barros 45

Analysis of uncertainties associated with different methods to determine soil hydraulic properties and their propagation in the distributed hydrological MIKE SHE model
K. Christiaens and J. Feyen 63

Simulation of water drainage of a rain forest and forest conversion plots using a soil water model
R. Klinge, J. Schmidt and H. Fölster 82

An inverse modeling approach for the characterization of unsaturated water flow in an organic forest floor
K. Kosugi, K. Mori and H. Yasuda 96

Rainfall disaggregation using adjusting procedures on a Poisson cluster model
D. Koutsoyiannis and C. Onof 109

A conceptual, linear reservoir runoff model to investigate melt season changes in cirque glacier hydrology
D.M. Hannah and A.M. Gurnell 123

Groundwater flow patterns in a large peatland
C.J.D. Fraser, N.T. Roulet and M. Lafleur 142

On Bouchet's complementary hypothesis
J. Szilagyi 155

Modelling historical lake levels and recent climate change at three closed lakes, Western Victoria, Australia (c.1840–1990)
R.N. Jones, T.A. McMahon and J.M. Bowler 159

An analysis of the feasibility of long-range streamflow forecasting for Colombia using El Niño–Southern Oscillation indicators
F. Gutiérrez and J.A. Dracup 181

Analysing forest transpiration model errors with artificial neural networks
S.C. Dekker, W. Bouten and M.G. Schaap 197

Regionalization of lumped water balance model parameters based on multiple regression
Y. Yokoo, S. Kazama, M. Sawamoto and H. Nishimura 209

Geostatistical and geochemical analysis of surface water leakage into groundwater on a regional scale: a case study in the Liulin karst system, northwestern China
Y. Wang, T. Ma and Z. Luo 223
